Give indicative architecture of the project

Based on the RFP, the project is to build an Enterprise Data Lakehouse, Governance, and Analytics Platform for OICL. The RFP expects the bidder to submit an indicative architecture that covers the data ingestion, storage, processing, and analytics layers. The project objectives are to create a centralized data platform, enhance data governance, and enable advanced analytics and reporting.

Indicative Architecture

- ML Workbench
- Feature Store
- Model Training
- Explainable AI

Enterprise Data Lakehouse

Bronze Zone (Raw Data)

Silver Zone (Cleaned Data)

Gold Zone (Business Ready Data)

- Structured Data
- Semi-Structured Data
- Unstructured Documents
- Historical Archive

Governance & Metadata Layer

- Data Catalog
- Metadata Repository
- Data Lineage
- Data Quality
- Master Data Management (MDM)
- Data Classification
- Audit Logs

Data Ingestion & Integration Layer

- Batch ETL/ELT
- Streaming (Kafka/PubSub)
- CDC
- APIs
- File Upload
- Data Validation
- Data Contracts
- Replay / Backfill
